Forbes INDUSTRIES

THE STANDARD OF LUXURY IN *MOTION*

FORBES 5 STAGES OF QUALITY

QUALITY STARTS WITH HOW IT'S BUILT!

At Forbes Industries, our commitment to quality goes beyond manufacturing. It's a proven process that ensures every product we build meets the highest standards at every stage, from order to delivery.

1		**EXPERT ORDER REVIEW** Our experienced sales team verifies product selection, finishes, accessories, mods, and custom requirements. Each order passes through serveral departments to confirm all details before manufacturing begins.
2		**BUILT-IN MANUFACTURING QUALITY** Quality control is integrated throughout our production. Components are inspected from raw materials to subassemblies and then through final assembly.
3		**EXCELLENCE IN FORM, FIT, & FINISH** After assembly, our dedicated team verifies that the product meets all form, fit, and finish standards before it moves to final inspection.
4		**FINAL INSPECTION** Our quality control team verifies the finished product against engineering drawings, custom specifications, and functional requirements.
5		**PROTECTIVE PACKAGING & SHIPPING** After passing inspection, every product is prepared and carefully packaged to protect surfaces and components throughout transit, ensuring it arrives ready for service.

THE FORBES **DIFFERENCE**

Multiple quality checkpoints throughout the process

Products built with you and your customer in mind

Experienced hospitality manufacturing professionals

Rigorous inspections before Packing product
